

Native Plant Provider Registry

Secon Edition, December 2017

As part of Carolinian Canada's exciting new initiative with World Wildlife Fund - Canada, In the Zone (www.inthegardens.ca), we want to help gardeners find the best possible sources for their native plants. So we have created a voluntary on-line registry for organizations and businesses who provide native plants In the Zone. Rather than Carolinian Canada officially endorsing or certifying plant sources for this listing, we have made it possible for any nursery, garden centre, non-government organization, community group or plant sale to register on-line. The only prerequisite for inclusion is that the native plant provider maintains a current membership with Carolinian Canada. In the table below, each source for native plants provides information about themselves (location, web site, etc.), as well as whether their products meet certain key criteria of importance to native plant gardeners. For example:

Are all their plants locally and ethically sourced?

Is plant source history available?

Do they ever sell invasive species?

Are they open to the public year-round or only at certain times?

Do they sell wholesale or retail?

What kinds of plants do they sell (wildflower seeds, aquatics, trees, shrubs, perennials, etc.)?

Do they offer other services (e.g., landscaping, consultations)?

Expect updates to the listings in the coming months. As this registry becomes populated, we expect it to offer conscientious gardeners a wide selection of native plant providers from which to choose, so that together we can create a greener, healthier future!

Company / Organization Name	County / Regional Municipality	Contact Info	Commercial (C) / Non-profit (N)	Retail (R) / Wholesale (W)	Availability Period	Guaranteed Carolinian Zone native plants	Guaranteed Ontario native plants	Mix of Native & Non-native plants	Plant product source history available	Guaranteed locally-sourced material only	ONLY ethically-sourced plants sold	NO Aquatic Invasive Species sold	NO Terrestrial Invasive species sold	Sell Trees & Shrubs	Sell Wildflowers / Grasses / Sedges	Sell Terrestrial plants	Sell Wetland plants	Sell Aquatic plants	Sell Seeds	Sell by Mail Order	Other Services Provided	Additional Comments

St. Williams Nursery & Ecology Centre	Norfolk	885 Hwy 24 W P.O. Box 150 St. Williams, ON, N0E 1P0 info@stwilliamsnursery.com	C	W	All Year	Y	Y	N	Y	Y	Y	Y	Y	Y	Y	Y	Y			Y	Y	St. Williams specializes in wholesale supply of native plants. We carry over 300 native species of trees, shrubs, wildflowers, sedges and grasses in a wide variety of formats. We also carry native source-identified bulk seed mixes that can be customized to your requirements. St. Williams can provide consultation services, supply of plant material and/or install for large projects. We also can set up contract grow options. Please talk to us about any needs your restoration project may have! Examples of restoration services we carry out include: Detailed Site Evaluation (baseline conditions survey, inventory assessment, constraints evaluation); Planning and Design (including costing); Site Preparation (clearing, grading, and tillage which may include soil decompaction, scarification, pit and mound creation, soil amending); Seeding, Planting and related landscape services; Invasive Species Eradication and Weed Management; Maintenance and Tending (e.g., irrigation, pest management, prescribed burns); Long-term Management Planning and Operational Training (turn-key solutions). We have a small retail online shop where you can find seed packets, native plant garden packs and books on Native Plant gardening: https://stwilliamsnursery.com/shop/	We carry a wide selection of rare and hard to find Carolinian Zone species. We track where all of our seed was sourced from so that each plant's origins and seed zone are known. All of our plants are grown from seed sustainably sourced from Southern Ontario.
